FIPALIFTmax
for heavy and
bulky loads

Universal use

The FIPALIFTmax, with a lifting capacity of up to 160 kg, is a flexible and durable solution to remove the risk of injury from lifting heavy objects. Suitable for handling everything from heavy sheets and plates to sacks, boxes, and crates. All lifted with ease; enhancing wellbeing in the workplace.

Its robust yet compact design makes the FIPALIFTmax an ideal solution for rough production environments.

Intuitive operation

Due to the simple twist grip, similar to that on a motorcycle, the operation of the tube lifter is uncomplicated, precise and above all intuitive.

“It has never been more fun moving heavy goods in the course of everyday work.”

Wide range of accessories

A wide range of accessories such as vacuum suction cups and gripper solutions make the FIPALIFTmax extremely variable and versatile.

For special requirements that are not covered by the standard program, we are happy to offer you uncomplicated special solutions on request – with the least effort.

Simple operation with the twist grip.

Quick-change adapter for the accessories included as standard.

Full range of vacuum pumps to suit every application.

Total flexibility with handle lengths of 250, 500, and 750mm available as standard.

FIPA, challenge accepted.

Vacuum, gripping and lifting technology
for reliable and efficient handling
of your workpieces.
